

2degrees Awards Celebration

Client Brief:

2degrees partnered with Vidcom to create a memorable awards night that celebrated and acknowledged the hard work of their staff.

The main goal for 2degrees was to have an event that had impactful video content. They wanted high definition displays and quality audio that can grab attendees' full attention. They were also after an experienced team that can work harmoniously and courteously to execute the event seamlessly.

Vidcom's Solution:

The Vidcom team delivered an AV solution where soft wash stage lighting was matched with high quality technical displays including 2 large projector screens and laser technology projectors to ensure sharp image quality. Along with a large high definition 2.6mm pitch LED Wall for behind the stage. For audio, the team had strategically placed speakers and subs for a full range sound system which allowed for superior audio quality throughout the event.

Client Feedback:

“ Rowan and the team were very respectful and professional. The LED wall is nowhere close to the drop down screen...it made a huge difference to our viewing experience and the audio, flawless. The night was a huge success and this is the first time that I didn't have any issues with the AV. So thank you Jason for all your patience, professionalism, and for ensuring that our experience is one that we will truly remember and be grateful about. It felt good to be well looked after!”
